

Such a life, do you like?!

I introduce a man who describes his campus life in his age. He describes how to learn wash clothes, allocate money, and talk with friend or lover and so on.

By: Taotao He 130306136 Class 2

Some days ago, I interviewed a person in the age that internet and smart mobile phone don't appear. And he told me some things that is showed in follow.

"In life, we rarely take the clothes to the laundry to wash, and we all wash the clothes ourselves. Of course there will be people that they are not able to wash clothes, after we find it because they cannot put it all down according to a letter sent to the we chat, so they can together face to face in the water room laugh at him and despise him Then he would certainly not satisfied, laughing back to the curse, a last-ditch fight for the hedge will not be so easy to get angry like otaku, we cannot put everything sent to the we chat.

Each person's skills and expertise, at that time, the basic will get some use. We will write poetry can go propaganda, and the students that have art skills can enter the student union. And the talkative or quick thinking may participate in the debate competition. The pushy when all kinds of school and may Moderator college programs.

And I, as a science student, in fact my math is poor very much. But I was not useless, after all my words is very good,

although it is not first-rate, but it is pretty than most of the students have not practiced the word. So I often help others. I remember I helped a classmates in the student union which declared the painting to painting room late, despite it is a very bad picture, but the we are laughing and chatting nonsense telling of the past, and no we chat's and message's bother. So we relaxed painting late into the night, finally complete the task. The next morning, a large plate of a piece of sensational publicity activities appears on all roads go through the school for everyone to enjoy, or cast aside, but I met those already in full color and text in the.

In the winter, the school has a slope of roads will freeze, I will frequently born and it is very embarrassed. Then my classmates will help me, of course, I would not rely on help me. As usual, the students in south of China will be laughed and despised, and after laughing at the north of the students will teach us skate or skate along with us . Snow big time, everyone cries banded together to fight a battle cattle cross the snow. Department of Architecture, many people, often with grades as a unit, the sky snow in a scuffle, there are always passionate young or anger show alone was outrageously out of the trenches are then instantly annihilate each other, and there will always be you are not raising his hand a be careful to hit each other a girl, there will always be your UFO lying face hit the door slamming when complacent, always one offensive and one negative was gradually broken up and still surmount . Regardless of the results of the war, the people will greet the end of the snow, thunderous applause. Such moments of joy, should not Apple can bring .

After lights out, as usual, is all kinds of chat, nonsense and laugh. Covering all aspects, from the girl's face shape, you can talk about Western art, and then to the deep outer space and even worldly people's sufferings. The rise comes even be triggered impassioned debate and even majestic individual presentations at this critical juncture; we would eleven lying

give your score, cut, or not cut. PK sometimes not ending, the judges and the voice of the players will be gradually increased to disturb the neighbors, until the instructor roar outside, objective and rational manner by threatening to repair our school rules. To the exam season , someone poor review, uneasy , you need to lowly place candles or open emergency light reading, bedroom atmosphere created by their unusually strange panic. There's even a studious person reading by the light in the hallway , and even perverted in order to complete the job drawings strapped drawing board in the hallway, bedroom, foyer, these are the various views of the middle of the night . At the time we really did not think , after a few years, so there could be so many digital products, you can lie on his bed after lights out to see ah !

With today's most distinguished students who also made □□us the most exciting part of the excitement and undoubtedly paper correspondence. At that time, the emergence of cellular phones and motorcycle L2000, but not that we have the ability to use. No micro-channel, no MSN, no we chat, of course, there will not be unfamiliar street, at most there is a pager. Apart from using a public phone at night to carry a greeting from afar , and more, we will spend some time writing letters full of emotion , and the rest , that is to wait and miss it.

A letter will arrive on a few days, a week or even more. Wait and miss, so all of this, the United States a lot. This experience is meaningful and beautiful, but also cannot get again. Letters , we quiet down, sort of ideas, experiences and the changes in their detailed depiction of this period of time, to tell each other their hearts; letters , we honestly and calmly express their emotions and feelings; letters, we see true to yourself, but also to see the real counterpart. The Letter, in fact, the number is minimal.

The past decade is not necessarily better than nowadays, but it must have its bright side. The focus I want to express that in those without much technological toys of the era, the

distance between people is indeed very close, and our time is indeed happy and fulfilling, memorable and beautiful. I really nostalgic , is to beautify the past, because in my opinion , in those days , such as the moment , many years later can become good memories . But do not think I ever painted, is to obliterate Now, not so. I regret to say the year of our youth, apparently was not intended to deny the current students who ridiculed the youth. He is the youth of this youth, will certainly be gorgeous lovely moment, it must be noted. With advances in technology, life will be better, of course, and indeed more beautiful. Because I love my present life and times, but also because there is now a technological convenience, I will occasionally see this problem in the middle of the night when the fast write these words about the memories, I 'll be tempted to think the time Some touching flashback presented to the dwellers , some of the sense of pain and laughter when talking dwellers do share, nothing more. Thank you."

The story has ended here. And [such a life](#), do you like it?
