I like his prairie, so quiet, gentle, giving a warm feeling of tranquility. Unlike the kind of magnificent sea shock, the ups and downs emotionally sigh! Grassland scenery gives the first impression is refreshing! No large villages. Looking around the vast expanse of prairie at the foot extending to the end of the line of sight. The kind of smooth and soft curves. Makes you feel very comfortable. Run in the grasslands and the kind of contact with nature is no diaphragm and tolerance, so I love the prairie. See here is a blue sky blue beneath pure

extreme, pure no trace variegated. The Hill in the distance is the same clear. The clouds in the distance like landed on the grasslands. Prairie put on a beautiful coat! Grassland scenery will bring relax to eye, the mood has also been a perfect release. This is heaven! With the clouds of heaven drift, prairie bright and alternate changing . The mood is like cotton candy, with the warm wind of the grasslands, rippling Gently.

[Tibet](#) has too much beauty, many artists and art lovers came to Tibet in search of inspiration, the purpose is to find look for beauty, pursue for beauty. As young artists Song Seng, like Northwest figures, five years in a row to the northwest, in his own words, he Qinghai, Tibet has formed a dependency snow style. He has an annual fee to the northwest folk songs, long train, live in a small hotel in the town, the harsh conditions just have fun. He said that as a painting of people, to the west will find that no matter where the landscape or figures, are particularly picturesque. Through the blue sky on the plateau, the complex ethnic costumes, children's eyes, until the butter lamps temple robes, Lama, and these things themselves in the eyes of painters treasures, to have the opportunity to be close to such a treasure, is my greatest pleasure.

Tibet, a place worth going.
